EDUCATION

University of Virginia
Bachelors of Arts, CS
2016 - 2019 or 2020

- Computer Science, Major GPA: 3.5
- Honors: Jefferson Scholar (full ride merit scholarship), Echols Scholar, Dean's List
- Interests: Artificial Intelligence/Machine Learning, Philanthropy Tech, Social Entrepreneurship

WORK EXPERIENCE

Babylon MicroFarms
Software Engineer
Fall 2018 - Present

- Working to help develop IOT data management and edge computing strategy
- Architecting database, micro-servicing strategy, and machine learning applications
- Refactoring containerization strategy to work with Docker and Ansible automation

Amnesty International:
Urgent Action Network
Consulting Developer
Fall 2018 - Present

- Working to create a data analytics dashboard for the Urgent Action Network
- Coordinating a remote team to divy up work and stick to the delivery schedule
- Developing security protocols for writing and retrieving confidential data

Red Hat Consulting:
Open Innovation Labs
SRE Intern
Summer 2018

- Worked directly with the SRE team to solve pressing back log items that directly created value
- Built search feature for the Open Practice Library from scratch to increase functionality of tool
- Automated infrastructure deployment of Open Shift and all relevant tooling
- Participated in the Open Innovation Lab's DevOps Enablement training

The Impact Fellowship
Impact Fellow
January 2 - 16, 2018

- A selective computer science fellowship focused on developing technical social entrepreneurs
- Completed courses on advanced computer science & web development tools: React, Node, Express, Firebase, MongoDB, Solidity, and D3
- Met speakers and leaders from NGOs, social startups, think tanks, and philanthropic organizations
- Developed a team project that automates mentorship of at-risk youth

University of Virginia
Head Algorithms TA
Nov. 2018 - Present

- Lead weekly recitations to recap lecture material
- Organize and facilitate weekly office hours
- Create and administer course policies
- Design homework and exams and create test suites
- Hire and manage staff of TAs

RESEARCH & INDEPENDENT PROJECTS

University of Virginia
Research Assistant
Fall 2018 - Present

- Research Assistant to Prof. David Evans on analyzing weaknesses in Machine Learning classifiers
- Examing cost-sensitive robustness against adverserial examples in Deep Neural Networks
- Assisting in creation of new cost matrixes and running models to determine weaknesses
- Verifying experimental results across models

Student Taught Course
Topic Spatial Reasoning
Instructor
Fall 2018 - Present

- Created curriculum & course content with fellow instructor & Professor Luther Tychonievich
- Built a website to host all relevant course documentation and policies
- Implemented research based lesson plans to increase student engagement
- Actively collected data on course to focus on data driven improvements for tangible change

Open Algorithms Project
Primary Author
Winter 2018 - Present

- Writing an open source algorithms textbook covering a description, proof of completness, proof of complexity, & implementations for commonly used computing algorithms
- Tooling: R-Markdown, Bookdown, Pandoc, and Github Pages
- Project Home: https://github.com/rohitmusti/The-Open-Algorithms-Project

The Hult Prize
Competitor
Spring 2018
https://hultprize.org

- The Hult Prize is the world's biggest engine for the launch of for-good, for-profit startups emerging from universities with over 2500 staff and volunteers around the world
- Competed in the regional finals as one of 3,000 teams out of 100,000 applicants
- Our idea was varying powerline currents to eliminate energy theft (a 90 billion dollar problem)

SKILLS

Languages: Python, Java, C++, C, Javascript
Tools: Ansible, VueJS, Docker, Django, Boot Strap, CSS Grid
Project Management: Git, Github, Gitlab, Agile, Trello, Asana
